

Case Study

Developing frameworks and educating teams for continued success!

Summary

M12 Central required a Sustainability Manager to develop and implement a sustainability framework on the project to comply with TfNSW's sustainability monitoring and reporting requirements.

RESULTS

Sustainability contractual requirements were exceeding in some areas, such as ecology and materials management, through sustainable procurement practices.

100%

Sustainability contractual objectives and targets met

CHALLENGES

With a tight schedule in project start up, iCCOUNT had to review the contractual requirements, develop the sustainability framework and then train and educate the team through sustainable procurement, materials management, circular economy and climate change procedures.

SOLUTIONS

The sustainability framework was implemented and is on course to meet all contractual requirements and meet the independent sustainability rating specified in the contract.

Contract Review

Project Management

Delivery wins

BENEFITS

Outcome

1

Project sustainability framework developed and implemented through training and workshops

2

Project Management

Procedures for monitoring and reporting were aligned to contractual objectives and targets

3

Continued success

The project continues to meet all of the sustainability contractual requirements
